OIL & GAS

Oil & Gas

CivilArts provides comprehensive Oil & Gas Services to both the Land Development and Oil & Gas industries.

“Coexistence through planning” is the cornerstone of our philosophy. For new developments we provide mapping of oil & gas infrastructure and identify surface rights. We provide planning that will maximize development in concert with oil & gas interests. Through legal counsel and in cooperation with the oil & gas companies, we identify current and future plans and prepare Surface Use Agreements that allow development to proceed while respecting the rights of oil & gas companies.

CivilArts also offers comprehensive support services for the oil & gas industry. We provide well location certificates, well staking, site planning, and engineering of well pads and access roads. We provide database management for submittals to the Colorado Oil & Gas Commission, as-built mapping of infrastructure, and exhibits for legal documents.

Services for Land Developers:

- *Surface Use Agreements*
- *Land Use Planning*
- *Above & Below Ground Infrastructure Mapping*
- *Facilities Relocation Design*
- *Cost Benefit Analysis*
- *Setback & Separation Standards*

Services for Oil & Gas Industry:

- *Well Location Certificates, Well Staking, Vicinity Map, Pre Construction Photos*
- *Site Planning*
- *Boundary Resolution & Setback Mapping*
- *Well Pad Engineering*
- *Road Plan & Profiles for County Approval*
- *Exhibits for Legal Documents*
- *Database Management for COGC Submittals*
- *As-Built Mapping of Oil & Gas Infrastructure, Certificates & Data Management*

Coexistence through planning is the cornerstone of our philosophy.
